Books Descriptions

To diagnose a mental disorder or evaluate a disability claim, clinicians must assess functional impairment--not just the presence of symptoms. Meeting a key need, the

Barkley Functional Impairment Scale (BFIS) is the first empirically based, norm-referenced tool designed to evaluate possible impairment in 15 major domains of psychosocial functioning in adults. Featuring both self-report and other-report forms (for example, spouse, parent, or sibling), the BFIS is reliable, valid, and user friendly.

The long version takes the average adult 5-7 minutes to complete, and the Quick Screen takes only 3-5 minutes. Includes Permission to Photocopy Enhancing the convenience and value of the BFIS, the limited photocopy license allows purchasers to reproduce the forms and score sheets without the expense of reordering materials from the publisher. The large format and sturdy wire binding facilitate photocopying.
