Books Descriptions

Hassan Fathy is Egypt's best-known 20th-century architect. He was also a man of contradictions. He came from a wealthy background and had a western-style training. Yet he embraced traditional, vernacular forms, techniques, and materials and throughout his career promoted their use as part of a campaign to improve the conditions of Egypt's rural poor. *Earth & Utopia* chronicles this lifelong commitment through personal interviews conducted by the author, photographs, and drawings from the Hassan Fathy archives, and Fathy's own writings on the subject, many of which are published for the first time. This beautiful, fascinating, and scholarly book will be essential reading for students, academics, and general readers interested in Fathy, and the development of Arab and vernacular architecture, earth construction, architecture for the poor, and sustainability.?
